

Timer filter control is used for the cleaning of pleated filter cartridges for easy and cost effective automatic solution.

Control is mainly used in small filter units without difficult dust types.

## Description

- Filter control with timer-control
- Easy setting of cleaning impuls and interval time
- Is mounted directly on jet valve
- Preferably for weather-protected application

### Technical data:

Power supply	24VAC or 230VAC, 50/60Hz
Max. current	0.8 Amp.
No-load current:	2mAmp.
Cleaning impulse:	0-1 sec.
Interval time:	0-5 min.
Protection rating:	IP65
Temperature:	-20 - +70°C
Item no.:	09 564 700
